

SOMANATH NAIK

Email: somanathnaik2103@gmail.com | Bhubaneswar, Odisha, India

Portfolio: kodexsom.github.io/somanathPortfolio

PROFILE

Computer Science student building a foundation in cybersecurity. Currently learning networking, Linux, Python, and core cybersecurity concepts through structured coursework and hands-on practice. Interested in penetration testing and SOC/security operations, with a focus on learning by building practical projects.

EDUCATION

B.Tech in Computer Science — 5th Semester

Bhubaneswar College of Engineering | Expected 2028

Diploma in Information Technology

Government Polytechnic, Bhubaneswar | 2022-2025 | Percentage: 80.75%

ITI in Electronics

Government ITI Bhubaneswar | 2018-2020 | Percentage: 84.50%

Class 10

Government High School, VSS Nagar | 2018 | Percentage: 73.60%

TECHNICAL SKILLS

Programming: Python — beginner; currently learning scripting and automation

Networking: TCP/IP, OSI model, DNS, HTTP — fundamentals / learning

Cybersecurity: Security fundamentals, common threats and vulnerabilities — learning

Linux: Command line and basic system concepts — learning

Web Security: OWASP Top 10 concepts — currently learning

Tools: VS Code, Git — basic; currently building hands-on experience

Other: MS Excel, Word, PowerPoint, basic electronics

PROJECTS

PhishGuard

Early-stage cybersecurity project — currently in the beginning phase of development.

Planned as a phishing-awareness and detection project. The goal is to learn how phishing works, analyze suspicious links/messages, and build a practical security-focused application while developing Python and cybersecurity skills.

Status: Planning / early development

NetRecon Scanner

Planned learning project.

A future Python-based project intended to help practice basic network reconnaissance, host discovery, ports, and service identification in controlled lab environments.

Status: Planned — not yet completed

VulnLog Tracker

Planned learning project.

A future project for documenting vulnerabilities and findings from cybersecurity labs, CTFs, and practice environments. Intended to improve security documentation and organization.

Status: Planned — not yet completed

CERTIFICATIONS & LEARNING

- Introduction to Cloud Computing — Coursera
- Cloud Computing Application Part-1 — Coursera
- Foundations of Cybersecurity — Coursera
- Play It Safe: Manage Security Risk — Coursera
- Coursera Generative AI — Coursera
- Certified Junior Cybersecurity Analyst (CJCA) — Currently Learning

CURRENT LEARNING

- Building networking fundamentals
- Learning Linux and command-line fundamentals
- Learning Python for cybersecurity and automation
- Studying cybersecurity fundamentals and common vulnerabilities
- Beginning hands-on cybersecurity labs and practical exercises
- Developing PhishGuard as an early-stage project

SOFT SKILLS

- Problem-solving
- Adaptability
- Communication and teamwork

INTERESTS

- Cybersecurity
- Ethical hacking and security research
- Learning new technologies
- Reading
